

EXTENDED REGULATION

The Extended Regulation unit is over 30% larger than the standard Regulation unit and is built to the same Ontario Ministry of Labour standards.

"Meets Ontario Ministry of Labour standards with 30% more space than the standard Regulation unit."

Inside, the Extended Regulation unit retains the same flush and wash capabilities as the Regulation unit, while offering much more space. The flush and wash controls are foot or pump operated to maintain a higher level of sanitation.

Service is performed on-site by our trained technicians and includes the cleaning of the restroom, removal of waste from the tank and restocking of supplies as required. We offer flexible service intervals to suit your schedule whether it's daily, weekly, monthly or any other frequency. Our technicians document all service stops inside the restroom for your review and convenience.

DIMENSIONS
