

## REGULATION UNIT

In order to meet Ontario Ministry of Labour standards and provide a more sanitary environment for workers, the Regulation Unit was created.

*"Meets Ontario Ministry of Labour standards while providing more comfort for users."*

Designed with Ministry of Labour standards in mind, the Regulation Unit includes flush and wash capabilities and includes a flap that separates the user from the waste. Foot or pump operated flush and wash controls increase the level of sanitation offered by this unit.

For elevated job sites, the Regulation unit can be outfitted with a sling to allow lifting by crane.

Servicing is performed on-site by our trained technicians and includes the cleaning of the restroom, removal of waste from the tank and restocking of supplies as required. We offer flexible service intervals to suit your schedule whether it's daily, weekly, monthly or any other frequency. Our technicians document all service stops inside the restroom for your review and convenience.

### DIMENSIONS

- External 43.5" X 47" X 91"
- Weight 189lbs
- Waste capacity 34 gallons
- Fresh water capacity 34 litres

### INCLUDED IN OUR SERVICES
