

VIP-1

For sites requiring a hard walled unit that takes up as little space as possible the self contained VIP-1 is the perfect choice.

"An excellent choice for seasonal rentals or construction sites."

Engineered to meet Ontario Ministry of Labour standards and withstand harsh Canadian winters the VIP-1 is tough enough for any site. With hot and cold running water as well as a flush toilet, the VIP-1 provides amenities once thought to be only offered in higher end models.

Service is performed on-site by our trained technicians and includes the cleaning of the restroom, removal of waste from the tank and restocking of supplies as required. We offer flexible service intervals to suit your schedule whether it's daily, weekly, monthly or any other frequency. Our technicians document all service stops inside the restroom for your review and convenience.
