

VIP MonoSan

Exceeding the level of comfort provided by conventional portable washrooms, the VIP MonoSan offers upscale amenities, natural lighting, and fresh water flushing toilets in a completely self contained unit.

"Upscale features provide an inviting atmosphere for your special event."

The exterior is made of a durable thermoplastic called MonoPan®. This state of the art material allows natural light to fill the inside of the unit while still remaining extremely durable.

For high end special events that require more refined facilities, the VIP MonoSan raises the standard. With 30 percent more space than other portable restrooms, fresh water sink and toilet, and a full vanity including mirror, the VIP MonoSan fits in at special events or anywhere fresh water is needed.

Service is performed on-site by our trained technicians and includes the cleaning of the restroom, removal of waste from the tank and restocking of supplies as required. We offer flexible service intervals to suit your schedule whether it's daily, weekly, monthly or any other frequency. Our technicians document all service stops inside the restroom for your review and convenience.

DIMENSIONS

- External 64" x 54" x 90"
- Waste Capacity 32 US gallons
- Fresh water capacity 41.4 US gallons

INCLUDED EQUIPMENT

- Fresh water flush with seat
